# 1. Bug report

- The bug found will be reported in MantisHub

The screenshot displays the MantisHub web interface. On the left is a sidebar with navigation links: Dashboard, Issues (highlighted in blue), Create Issue, Change Log, Roadmap, Manage, Wiki, and Classic UI. The main content area shows the breadcrumb 'MyProject > General > 00001' and the title 'BUG-API TESTING - UPDATE01'. The 'Details' section contains the description: 'Invalid status code with Invalid data (400 or relevant instead 200)' and steps: 'When type invalid input (negative price, negative quantity) returns 200 status code instead 400.' The 'Relationships' section shows 'No related issues' with an '+ Add' link. The 'Users following this issue' section includes a 'User List' dropdown and an 'Add' button. The 'Add Note' section shows a note from '@administrator' with 'public' and 'private' tabs. On the right, an 'Overview' panel lists metadata: CATEGORY (General), PRIORITY (high), SEVERITY (minor), STATUS (new), RESOLUTION (open), ACCESS (public), REPORTER (@administrator), ASSIGNED TO, and FOLLOWERS. It also shows 'CREATED' and 'UPDATED' timestamps as '2025-08-25 09:45'. At the bottom of the overview are buttons for 'Edit', 'Assign', 'Status', and 'Close'. A rich text editor toolbar is visible at the very bottom of the main content area.
